# Pro Audio
Network Solutions

Experience Superior Integration & Compatibility
with RME's range of AoIP-capable Devices.

Use MADI to transfer & control audio between different network formats

Since creating its first MADI product, RME has grown to become a master of the format. The ability to split, route and mix audio with guaranteed quality and latency means that MADI remains a popular choice in studio, live and broadcast environments.

There's no doubt that audio networking is set to become progressively more commonplace in pro audio circles over the next decade. RME Network Audio devices designed to meet the demanding requirements of professional studios, immersive sound installations, live sound systems, and industrial applications. RME converters are available with Dante® or AVB/MILAN and provide a variety of models including preamps, converters and high performance sound cards.

The internal routing of the 12Mic and M-Pro Series can be used to connect different devices via MADI. This makes it possible to build a bridge between Dante and AVB MILAN.
